***Pertexa Healthcare Technologies, Inc. and The California Health Information Partnership & Services Organization are pleased to Announce a Strategic Partnership to assist California physicians by offering assistance with Merit-Based Incentive Payment Systems (MIPS) reporting and physician productivity tools.***

---

Pertexa, a California-based medical technology company, and The California Health Information Partnership & Services Organization (CalHIPSO), the nation's largest federally designated regional extension center, have agreed to an endorsed strategic partnership to offer assistance to California physicians with Merit-Based Incentive Payment Systems (MIPS). Pertexa will be participating with its next generation productivity app, Radekal.

Pertexa's sole business focus since its inception is helping small and mid-sized practices increase clinical efficiency and reduce billing costs. In 2018, small and medium sized practices need to increase overall productivity to survive, prosper and stay independent.

"The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) reformed how physicians and other clinicians are paid under Medicare Part B. We are excited to work with Pertexa and its unique Radekal solution to help provide reporting solutions that will reduce the administrative burden for physicians," said David Ford, Executive Director of CalHIPSO.

"Pertexa is committed to assisting physicians to improve the patient experience, work-life balance, and reduce administrative and cost burdens for medical practices and organizations. Our flagship product, Radekal, automatically documents, correctly codes, and generates reporting compliance for physicians. We look forward to working with CalHIPSO to help California physicians with cost effective and time saving reporting solutions," said Kishor Joshi, CEO of Pertexa.

**About CalHIPSO:** CalHIPSO was founded in 2010 by the California Primary Care Association (CPCA), the California Medical Association (CMA), and the California Association of Public Hospitals and Health Systems (CAPH). As the largest of 62 federally designated regional extension centers, CalHIPSO helps providers in California navigate the complicated world of electronic health record adoption.

CalHIPSO's covers nearly all counties in the state and operates via a network of local extension centers so as to deliver services that are within the medical neighborhood. See their website [www.calhipso.org](http://www.calhipso.org) or send an email to [info@calhipso.org](mailto:info@calhipso.org) for enrollment information.

**About Pertexa:** Pertexa, Inc. is a next-generation medical technology company headquartered in Ridgecrest, California that creates and distributes technology including RITA and RADEKAL, the nation's leading Physician's Productivity Tool, which has been shown to increase productivity by 30% by combining both hardware and app development for worldwide medical use. Pertexa is an innovative brain trust, advancing disruptive transformational technologies for an evolving healthcare environment.

900 North Heritage Drive, Building E, Suite 201, Ridgecrest, California 93555, USA
